

# Gold IRA Program

Realize the power of your Gold IRA with  
your free **United Precious Metals  
Association (UPMA)** account.

# Safeguard your retirement in a gold-bearing interest account.

## Why Gold IRA

UPMA members have the opportunity to diversify their retirement portfolios beyond stocks and bonds through a Self-Directed Precious Metals IRA. Unlike traditional IRAs, a precious metals IRA allows you to invest in physical assets like gold and silver coins, and Goldbacks.

These accounts serve as a safeguard against inflation and offer the ability to **preserve and grow your wealth in a hard physical asset** that holds its value long term.

## The Advantages

### Guaranteed Returns on your Account

Leasing options allow you to earn returns on your gold tender investments while maintaining ownership of your assets.

### Preserve your Purchasing Power

While the value of traditional assets like cash and bonds continues to decrease, precious metals maintain their value.

### Unmatched Flexibility and Control

Precious metals IRAs offer the flexibility to invest in a broader range of **assets that you hold and control**. When you're ready to request distributions you can do so "in kind". Which means you can choose not to convert to paper dollars, maintain your position with the metals, and avoid potential capital gains tax implications.

## Our Services
